# Outline

## **1** Introduction

## **2** Another Section

# Introduction

# Basic Theme Slide with Bullets

- Itemized bullet number 1
  - Sub-bullet number 1.1
  - Sub-bullet number 1.2
- Itemized bullet number 2

# Colourful Slide with a Numbered List

- 1 Enumerated item number 1
- 2 Enumerated item number 2

# Another Section

# Code with Syntax Highlighting

## Example Python Code Listing

```
1 import numpy as np
2 x = np.zeros(5)
```

# Example Theorem Environment

## Theorem

*The equilibrium point  $x = 0$  of  $\dot{x} = Fx$  is asymptotically stable if and only if the eigenvalues  $\lambda_i$  of  $F$  satisfy  $\operatorname{Re}\lambda_i < 0$ .*

# Example Alert Block

**This is an Alert Block**

Use this environment to draw attention to important stuff.

# Adding a Figure and Using a Blank Slide

- This is a standard bullet item
  - This is another bullet item, but without the bullet
- Notice how to include a caption

**Figure**

This is the Ingenuity Labs Research Institute's logo.

# Here is a Table Example

**Table**

This is an example of a table caption.

Small column	Big column		
Grouped items	Item 1		
	Item 2		
Usual row	Spam	Bacon	Eggs

# This Slide is Black and Has Maths

Try to integrate

$$x_0 = \int_0^\infty f_x(\tau) d\tau \quad (1)$$

where  $\tau \in \mathbb{R}$  is a variable.

## Theorem

*This is a very important theorem.*
